- Build your First Iot Application with Arm
- Google play Academy
- Machine Leaning at the Edge A Practical Introduction from Arm

Projects:

- Community Service “Irrigation” 180hrs project
- Gaspipeline Innerwall Damage detection and Analysing Use image processing

My present project information:

Topic: Gaspipeline Innerwall Damage detection and Analysing Use image processing.

the design of image processing technology applied to the gas pipeline damage detection system uses actual images of the pipeline crack for median filtering, threshold processing, edge detection, morphological processing, and feature extraction, thus effectively processing the image of a gas pipeline crack. Experimental results show that the system designed in this paper can achieve the expected purpose and can provide a certain reference for the production of image processing. Solutions based on a defect detection system of gas pipeline.

Internships:

- **1-month Machine Learning Internship** (Shasha)
- **6-weeks Python Full Stack** (excelr)

Extra-Curricular Activities / Services:

- Participated in technical events on the eve of “department events”.

Hobbies:

- Reading Books
- Learning new Skills
- Playing games
